

Proposal for EPS Student Project 2020-2021

EPS Brief D:

Lead Academic : Dr Daniel Shin

Project Title: Evaluating the sustainability of automatic doors.

Student work:

Students will conduct primary research on the unnecessary use of automatic doors and assess their financial loss, heat loss, and measure carbon footprint.

The end output is to evaluate the impact and propose a behavioural change intervention to curb this unsustainable behaviour.

Further details about this brief will be provided if appropriate interest is communicated.
