

Nottingham Trent University Course Specification

Basic Course Information

1.	Awarding Institution:	Nottingham Trent University
2.	School/Campus:	School of Architecture, Design and Built Environment / City Campus
3.	Final Award, Course Title and Modes of Study:	BSc (Hons) Construction Management – Part Time
4.	Normal Duration:	5 Years
5.	UCAS Code:	K200

6. Overview and general educational aims of the course

The BSc (Hons) Construction Management course is designed for students who want to undertake a leadership role in the global building construction process. The successful completion of a construction project requires careful co-ordination of many activities to ensure that it is finished on time and within budget, and is fit for purpose to the desired quality. As a construction manager you will ensure this is achieved.

The course takes the knowledge of theory into practice through professional and transferable skills development appropriate for the industry. Such development is essential preparation for preparing you for your continued role in the industry.

The course is accredited by the Chartered Institute of Building (CIOB). The development of this course has been guided by various documents including the CIOB Education Framework 2013:

<http://www.ciob.org/sites/default/files/CIOB%20Education%20Framework%20for%20Undergraduate%20Programme%202013.pdf>

The course you will study has been designed alongside the BSc (Hons) Quantity Surveying and Commercial Management course.

Your course therefore, benefits from being an integral part of a common framework. One of the main benefits to you is the flexibility to transfer at the end of your first year studies to the above course within the common framework.

[* transferability to the BSc (Hons) Quantity Surveying & Construction Commercial Management is subject to your original entry requirements. They should be acceptable within the requirements of the Royal Institution of Chartered Surveyors (RICS) and an approval from the course leader is required if you want to transfer to this particular course]

In summary, the course aims to:

- Provide you with the necessary knowledge and skills to become a key player in the construction project team;
- Equip you with the skills that will support your career and professional development;
- Prepare you for postgraduate study and lifelong learning.

7. Course outcomes

Course outcomes describe what you should know and be able to do by the end of your course if you take advantage of the opportunities for learning that we provide.

Knowledge and understanding

By the end of the course you should be able to:

- Analyse and evaluate the management and technical concepts, principles and theories associated with the development, production, refurbishment and maintenance of international construction projects; (B & C)
- Describe and discuss the legal, economic, financial, political, technological, environmental and sustainable principles, theories and practices which affect the construction process and the organisations that manage these processes; (B & C)
- Evaluate and explain the role of the construction manager and their professional and technical contribution towards the procurement, production and development of global construction projects; (B & C)
- Demonstrate a systematic understanding and explain the role of the construction manager within the collaborative construction project team to enable the procurement and production of global construction projects; (B & C)
- Demonstrate a systematic understanding of and discuss ethics, sustainability, health and safety and other values which affect and inform the professional role and responsibilities of construction managers to all stakeholders of the collaborative construction team. (B & C)

(B) Indicates that the outcome has been mapped to the QAA Land, Construction, Real Estate and Surveying benchmark standards accessible from:

<http://www.qaa.ac.uk/publications/information-and-guidance/publication/?PubID=3124#.WQsKyWVNVHg>

(C) Indicates that the outcome has been mapped to the Construction Industry Council (CIC) Higher Education Graduate Common Learning Outcomes accessible from:

<http://cic.org.uk/publications/?cat=other-publications>

Skills, qualities and attributes

By the end of the course you should be able to:

- Interpret project documentation and information and effectively communicate with all members of the collaborative construction team in matters relating to the global construction process; (B & C)
- Utilise appropriate tools and techniques in the planning, programming and control of global construction work including risk, value and financial management; (B & C)
- Make an informed contribution to the management team of global construction projects; (B & C)
- Utilise effectively the necessary range of appropriate written, oral and presentation skills; (B & C)
- Select and use effectively the necessary range of numerical methods for calculating, checking and presenting solutions to problems; (B & C)
- Evaluate the appropriateness of a range of sources including current research, draw on evidence to reflect and evaluate competing explanations to draw appropriate conclusions. (B & C)
- Work effectively in collaborative teams through interpersonal relationships and group dynamics to agree goals, plans, review and evaluate progress; (B & C)
- Define, investigate and analyse problems of a non-routine and unfamiliar nature

and apply judgement to devise practical and creative solutions; (B & C)

(B) Indicates that the outcome has been mapped to the QAA Land, Construction, Real Estate and Surveying benchmark standards accessible from:

<http://www.qaa.ac.uk/publications/information-and-guidance/publication/?PubID=3124#.WQsKyWVNVHg>

(C) Indicates that the outcome has been mapped to the Construction Industry Council (CIC) Higher Education Graduate Common Learning Outcomes accessible from:

<http://cic.org.uk/publications/?cat=other-publications>

8. Teaching and Learning Methods

The course modules utilise an innovative selection of teaching and learning methods. Classes are a mixture of formal lectures supported by smaller group classes such as seminars, workshops, surgeries, laboratory sessions, project meetings and tutorials. The smaller group sessions are designed to be more student-led than lectures. The university also provides an online resource to support teaching and learning, called the Nottingham Trent University Online Workspace – NOW. This course and all associated modules are represented on the NOW and it is used to assist the School team in providing you with various information associated with the course and modules delivered by the tutors.

Exercises based on real work problems are used in various project-based modules on the course. Collaboration and working in a team is an important skill for the profession working in a multi-disciplinary global environment. Therefore, a collaborative working and/or teamwork element is included in such modules. Analysis and problem-solving skills are further developed through the individual dissertation and project modules in the final year.

You will progress through stages of learning as you learn to become an autonomous learner. At Level 4 you will 'learn by doing', Level 5 you become an 'independent' learner, and a 'reflective' learner at Level 6.

9. Assessment Methods

The assessment is based on coursework and projects as well as examinations – including electronically assessed tests. Coursework assignments can be in various forms such as essays, reports, portfolios, class presentations, laboratory work and timed assessments. Projects can either be assessed either individually or as a group. Some of the assessments will involve you grading yourselves either for individual or team activities, supported throughout by formative assessment. Examinations and electronically assessed tests are scheduled appropriately throughout the academic year.

Different modules have different combinations of innovative assessment methods. They are designed to give you a variety of ways in which to demonstrate achievement of the range of learning outcomes.

10 Course structure and curriculum

The part-time route requires students to be working in appropriate employment while not in attendance at the University. Students following the part-time mode of study normally are expected to be in attendance one day per week for the duration of the academic year. The course runs for a total of five years.

On the part time pathway, you will study a diet of modules to develop the course outcomes as follows:

Modules	Year of Study
Level 4 120 credit points (CPs)	
Fundamentals of Construction (40CPs)	1
Introduction to Measurement & Cost (20CPs)	1
Practice in the workplace (40CPs)	1
Architectural Science & Building Engineering Services (20CPs)	1

Level 5 120 credit points (CPs)	Year of Study
Engineering Surveying (20CPs)	2
Construction Technology (20CPs)	2
Law (20CPs)	2
Contract Administration: Control and Finance (20CPs)	3
Construction Management Practice and Procedures (20CPs)	3
Sustainable Technology and Environmental Control (20CPs)	3

Level 6 120 credit points (CPs)	Year of Study
Contemporary Construction Themes (20CPs)	4
Construction Management Project (40CPs)	4
Corporate Management (20CPs)	5
Dissertation (40CPs)	5

11 Admission to the course

Entry requirements.

For current information regarding all entry requirements for this course, please see the 'Applying' tab on the NTU course information web page.

Non-standard / mature applicants will be considered on an individual basis. Students may be considered for advanced entry if they possess appropriate prior qualifications or experience.

Part-time mode applicants can apply direct to the University. Part time students must be in full time employment, within a role that is relevant to the profession/industry. All applications must be supported by documentary evidence of academic qualifications, attainments and references. All applicants are also invited to attend open days.

12 Support for Learning

Students are required to attend the induction course at the beginning of the first year. You will be provided with an overview of the way the course runs as well as an introduction to the IT, library and other teaching and learning resources. You will also receive a course handbook which contains the essential information about the course and the support we provide for your learning.

In addition to this, the course team runs a series of activities during the first week of term, including construction site visits, team building and practical hands on experiences. These will help you to meet fellow students from your course, and can be the start of some lifelong friendships. This week is where you will be assigned a personal tutor, who will run icebreaking sessions to get to know their tutor group and offer one to one meetings with individual students. Scheduled meetings will take place throughout your first year, but your tutor will be available at any point should you need them. Your personal tutor will be a key point of contact for you during your time at NTU, and will be on hand to offer advice and guidance on all aspects of your degree journey. In addition, all first year students will be assigned a student mentor throughout the first term who will be able to help you navigate your way through that transitional period.

The course leader oversees the smooth running of the course and also serves as a source of guidance and advice for you. Your subject tutors will assist you in subject specific matters.

The University has an electronic resource called the NTU Online Workspace (NOW) which is also used to provide course and module information to assist your learning. Further details can be found at:

http://www.ntu.ac.uk/current_students/studying/now/index.html

The library and learning resources and IT facilities are regularly updated to meet the teaching and learning requirements of the course. Further information can be accessed from:

<http://www.ntu.ac.uk/llr/>

The University Central Student Support Services offers extensive support and advice on a range of matters. Further information can be obtained from:

<https://www.ntu.ac.uk/study-and-courses/starting-at-ntu/services-and-support/student-support-services>

13 Graduate destinations / employability

The course is designed in consultation with both the professional bodies and industry employers, to ensure that the content is relevant to the construction management profession, and to ensure that our students are in the best possible position to gain employment at graduation.

Although part time students need to be in employment during their studies, the full range of employability support is still available should student wish to look for new positions if their personal circumstances change.

The success of students on securing employment after graduation demonstrates how suitable the course is for those entering the profession, either through full time or part time study routes.

Employment opportunities for our graduates within the construction industry are excellent, with 92% of Nottingham Trent University's graduates* with first degrees from full-time study are employed or engaged in further study within six months of leaving, NTU is one of the top universities in England and Wales for its graduate employment rate.

*of those available for work, DLHE survey 2015/16

The university is consistently placed to the top of the league table of all UK universities for graduate employment. Stats on the unistats website show that the course has 95% of grads working or in further study.

Information about ADBE placements can be found:
<https://www4.ntu.ac.uk/adbe/courses/placements/index.html>

Information about NTU Employability Team can be found:
<https://www4.ntu.ac.uk/employability/>

The following are some of the articles that highlight the excellent employability of our graduates.

14 Course standards and quality

There are well-established systems for managing the quality of the curriculum within the School. The course is subject to, and fully complies with, the University's requirements in respect of course standards and quality; this involves:

- The appointment of external examiners to the course. External examiners are appointed to each course and report annually on the appropriateness of the curriculum, the quality of student work and the assessment process.
- Monitoring of the course and the production of an annual Interim Course Report. At the end of each year the Course Leader writes an evaluative report, informed by staff and student feedback. This is then discussed by the Course Committee and the School Academic Standards and Quality Committee and actions are identified.
- Periodic review of the course. Periodic Course Review is the mechanism by which course teams reflect on the validity, currency, and the academic quality of the provision once every three years. This is a face-to-face discussion with external stakeholders and students centering on key data sets provided in advance of the meeting to enable appropriate consideration of the current and future quality and standards of the course. The outcome of the review is a three-year Course Development Plan.
- A Course Committee covering all undergraduate courses within the department of construction management are held three times a year, student representatives, elected by their peer group, attend and contribute to discussion.
- Staff/Student liaison committees are held three times a year where all undergraduate students are invited to attend.
- The course has been designed to comply with the accreditation requirements of the Chartered Institute of Building (CIOB). Further information can be obtained from: <http://www.ciob.org.uk>
- The subject benchmarks (Land, Construction, Real Estate and Surveying) of the Quality Assurance Agency (QAA) and the Construction Industry Council

(CIC) Higher Education Graduate Common Learning Outcomes have been incorporated into the course's learning outcomes.

15 Assessment regulations

This course is subject to the University's Common Assessment Regulations (located in Section 16 of the Quality Handbook). Any course specific assessment features are described below:

There are no course specific exceptions from the University regulations
