

Laxmi is a PhD researcher at NTU, her research explores green criminology of illegal wildlife poaching, focusing on the ivory trade in Tanzania.

Her academic background extends to the interdisciplinary fields of a Masters in Environmental Law and Sustainable Development from the SOAS and a Bachelor's BSc (Hons) in Environmental Science from the University of Nottingham. Her masters focuses on the Illegal Unregulated and Unreported (IUU) fishing and the implementation of Environmental Impact Assessments (EIAs) in developing nations.

Laxmi's work experience includes the Legal 500 in London where she was a researcher for the inaugural Client Intelligence Report (CIR), covering service delivery of law firms in multiple jurisdictions and industries. She has worked with the Society for International Development in Tanzania, researching for the State of East Africa Reports and the Greater Horn Quarterly Trend Monitoring reports, exploring the East African wildlife and energy sectors. Her research at the International Centre on small Hydro Power Plants in China and operating under the auspices of UNIDO, was for the compilation of the First World Small-Hydro Power Report 2013. She also has work experience relating to the cotton industry of Tanzania from a purely business perspective assisting in grant applications and collateral-loan management agreements with banks.
