

Computing Module Guidance

- Computing courses at Nottingham Trent University are only offered as full year exchanges, there is no semester exchange available.
- NTU students normally make a choice of modules with credits totalling 120 NTU (60 ECTS) credits per year, but you should check with your co-ordinator in your home university before leaving, as to what is specifically required of you.
- Students should be made aware that they are only able to choose modules from **one course and one level**. Due to strict timetabling restrictions we are not able to offer combinations of modules across different courses and years.
- If the content of your home course requires you to undertake a Level 6 module alongside Level 5 modules (or vice versa), we *may* be able to accommodate this request, but this cannot be guaranteed and a 'back up' Level 5 or 6 module should be chosen too.
- All modules are taught in English.

Modules available to Computing Exchange Students are listed below			
Subject / Module Code	Module Title	Level	Number of NTU Credits
COMP136 BSc Computing Level 5			
ISYS20111	Information Systems Development	5	20
ISYS20182	Practical Project Mgt and Prof Dev	5	20
ISYS20311	Information Security	5	20
ITEC20121	Interface Technology and Design	5	20
SOFT20101	Info & Database Engineering	5	20
SOFT20171	Internet Application Development	5	20
COMP136 BSc Computing Level 6			
COMP30151	Project	6	40
ISYS30261	Information Systems Management	6	20
ISYS30321	Serious Games	6	20
ITEC30041	Mobile Platform Development	6	20
Choose from one of the four modules below:			
ITEC20311	Information Security (level 5 module)	5	20
ISYS30221	Artificial Intelligence	6	20
ISYS30271	Business Analysis	6	20
ITEC30151	Data Visualisation and UX	6	20
