Guidance on the appointment of external specialists in academic approval

1. **Principles**

1.1 An external member is appointed to every Design Sprint and an external specialist is required to comment on all medium impact proposals for modifications to courses.

1.2 This external will provide an independent, objective and informed perspective on the proposal being considered.

1.3 An external may be drawn from a higher education institution or may be a practitioner from industry, commerce or a Professional, Statutory and Regulatory Body (PSRB). For some DAGs two external members may be required (academic/practitioner) – this will be determined at the DAG Scoping meeting and agreed by CADQ.

1.4 Where an existing or proposed course is seeking (re)accreditation from a PSRB then that organisation may provide the external.

2. **Qualifications, experience and expertise**

2.1 The course sponsor (leader) normally seeks a suitable external – but may consult with the Head of Department and School Standards and Quality Manager (SSQM).

2.2 A proposed external should be able to provide the following:
   a. a comparative judgment on the standard and quality of the proposal (based on their familiarity with similar courses outside NTU);
   b. an understanding of current developments in the academic or professional field;
   c. a familiarity with the knowledge and skills that employers and/or the professions require;
   d. an appreciation of effective learning, teaching and assessment practices in the subject.
2.3 A proposed external should preferably have sufficient recent and relevant experience of acting as an external validation, review or accreditation member, or have comparable related external experience that indicates competence for the role.

2.4 If a proposed external is inexperienced in terms of external scrutiny, then they will need to have had recent:
   a. internal involvement in validation, review, accreditation or similar activities;
   b. other relevant and recent experience likely to support the proposed role.

3. Independence

3.1 An external should not be associated with the University in any way (currently or within the past five years), or have been closely associated (professionally or personally or otherwise) with someone who has a relationship to the University (currently or within the past five years).

3.2 For example, the external should not be:
   - personally associated with the sponsorship of current students studying the course under scrutiny;
   - involved in the assessment of students following the course under scrutiny;
   - likely to be in a position to influence significantly the employment of existing or potential students following the course under scrutiny.

   **Note**
   - While the external may subsequently become an external examiner for the course, an NTU appointed external examiner (currently or within the past five years) may not act as the external at approval.

4. Approval of the external

4.1 The criteria for appointment are intended to help ensure impartiality of judgement and achieve objectivity.

4.2 However, the University accepts that decisions about the suitability of an external will often require a balance to be struck such that the criteria will need to be weighed against each other.

4.3 The support of the SSQM should be sought for the course sponsor’s preferred external (there is no need for referral to SASQC/or the completion of nomination forms) before sign off by CADQ.

4.4 CADQ retains the right to submit the proposal to the Chair of ASQC for consideration if there is doubt about the impartiality or expertise of the individual.
5. **Administration**

5.1 For external members, the course sponsor should make initial contact with a proposed individual in order to ascertain their appropriateness and their availability for the Design Sprint event. Following initial contact, CADQ will make formal contact with that individual.

5.2 In compliance with the Immigration, Asylum and Nationality Act 2006, external members are required to undertake a Right to Work check. The course sponsor should inform the proposed external of this requirement when making initial contact. Following sign off of the proposed external, CADQ and HR will liaise with the external colleague regarding the process.

5.3 A fee is payable to external colleagues. CADQ will arrange for payment.

5.4 For external specialists considering proposals for significant modifications, it is the School’s responsibility to identify and engage the individual. The arrangements for the external’s submission and consequent consideration is the responsibility of SASQC. CADQ’s role here is to agree the appropriateness of the proposed specialist.
