Welcome

Our European Project Semester programme will provide you with a supportive learning environment and an exciting learning experience. By spending time with us you'll get to enjoy a real slice of UK higher education. You'll also be able to explore our city and region, and learn more about British life and culture

Hosted by our Product Design subject group, EPS is a project-based study programme delivered and assessed in English, which combines both project work (20 ECTS) and supporting subjects (10 ECTS).

The semester facilitates multi-disciplinary and international teams, fostering a dynamic environment for skills and knowledge exchange. This occurs not only through structured sessions but also through peer-to-peer activities.

By integrating supporting subjects with live industry-led projects, the module aims to cultivate creative thinking and problem-solving abilities. The goal is to equip students with practical skills that are transferable across the design industry
