

NTU

P-ACE

Identification and Tracing Sensing and Surveillance

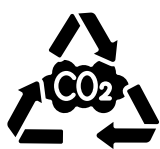

Firearm Investigations

Maximising forensic-led intelligence to make firearm-related investigations more timely, objective, efficient & effective.

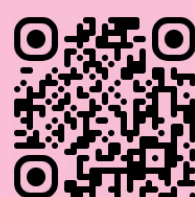

Forensic Science

Experts in drug profiling & toxicology, DNA analysis & bioinformatics, marks & traces, crime scenes, archaeology & anthropology.

Sustainable Chemistry

Developing new resilient & sustainable chemicals to achieve a cleaner, more productive & inclusive local economy.

Remote Sensing & Imaging

We develop & apply novel imaging & chemical analysis techniques to tackle wildlife, art & heritage crimes in situ.

Smart Sensing Lab

Designing novel sensors, devices, apps & dashboards to support decision-making, monitor environments & prevent crime for example.

Advanced & Smart Materials

Using advanced & smart materials to produce innovative solutions including thin films, 3D & 4D printing, biomedical devices.

Cyber Security

Dedicated to researching & implementing effective solutions to safeguard against cyber threats inc. intelligence & modelling.

Computational Intelligence

AI & data analysis experts solve real-world problems using robotics, assistive technologies & smart environments for example.
