

Open Access deals for NTU authors

The following publishers allow NTU authors to publish gold open access for **free** providing you are the **corresponding author**. Please note that the deal only applies to the open access costs and does not cover page and colour charges. Journals that are published on behalf of a Society may also be subject to an additional publication charge. Contact the [Library Research Team](#) for further help and support.

How to take advantage of the deals

- Before submission: Check the journal you are targeting is included in the deal and that the journal meets your funder's open access and licence requirements. [Sherpa Services](#) can help with this task.
- On submission: Use your **NTU email** when submitting your article to the publisher and identify **Nottingham Trent University** as your **affiliation** when prompted and in your paper.
- On acceptance: The publisher should make you aware of NTU's deal and you should choose to publish open access and to retain copyright by selecting an appropriate **creative commons licence** when you complete the journal publishing agreement.
- On publication: You are permitted to make the published version of record available online and to deposit it in [JRep](#) via [Worktribe](#).

Which licence should I choose?

UKRI or Wellcome funded? You must choose the CC-BY licence when publishing open access.

Any of the Creative Commons licences will allow you to comply with the REF open access policy.

- **[CC-BY \(Creative Commons Attribution Licence\)](#)**: Allows others to copy and redistribute the material in any medium or format and remix, transform and build upon the material for any purpose, even commercially. This is often the preferred choice for journal articles, particularly in science, technology and medicine, as it allows other researchers to make full use of the findings in their own work. This licence is Plan S compliant.
- **[CC-BY-NC \(Creative Commons Non-Commercial Licence\)](#)**: Allows others to copy and redistribute the material in any medium or format. However, the material may not be used for commercial purposes. It can be an appropriate licence for monographs because it protects print copy sales while still providing scope for users to create derivative works of the online version to the benefit of all academia.
- **[CC-BY-NC-ND \(Creative Commons Non-Commercial No-Derivatives Licence\)](#)**: Allows others to copy and redistribute the material in any medium or format. However, the material may not be used for commercial purposes and if you remix, transform or build upon the material these modifications cannot be distributed. The licence is particularly appropriate for books and other products where significant revenue is needed from derivative rights sales (for example, translation rights), in order to keep author charges low.
- **[CC-BY-NC-SA \(Creative Commons Non-Commercial Share-alike\)](#)**: Allows others to copy and redistribute the material in any medium or format, remix, transform and build upon the material for any non-commercial purpose, but the material may not be used for any commercial purpose. If the material is remixed, transformed or built upon, it must be distributed under the same licence as the original. While the Share-alike licence might sometimes encourage further uptake of OA by authors wanting to re-use the content, it can also create an unnecessary barrier to the re-use of the OA content.

American Chemical Society (2022-2024)

Open Access Licensing	Funded authors will be directed to the required licence type. Non-funded authors can select their preferred licence out of CC-BY or CC BY-NC-ND.

Wiley (2020 - 2023)	
Summary	<p>NTU authors can publish immediate open access free of charge* in any Wiley journal (full gold and hybrid titles are included).</p> <p>*Small print: This is a national agreement for UK HEIs and Wiley manages a central pot of money to cover APC fees across all UK institutions. A key condition of the agreement is that Wiley has guaranteed to pay the APC charges for UKRI and Wellcome funded researchers out of this pot. This is subject to annual monitoring and Wiley will restrict the deal to funded authors when the money runs low and they will communicate this to institutions. The pot will reset itself each January.</p> <p>If you plan to publish in a hybrid journal then you can still go ahead and publish in the usual fashion and you can deposit a copy of the accepted manuscript in Worktribe/IRep. However, if you were planning to publish in a fully open gold journal then you will have to find the money to cover the APC or change to a hybrid journal.</p> <p>Check if a Wiley journal is a hybrid or fully gold journal here</p>
Author actions	Full author instructions
Open Access Licensing	Check the licence options for your chosen journal here .

* Authors wishing to take advantage of a discount on fully OA titles should contact the Library Research Team for additional information. Please be aware that only UKRI funded authors are eligible to have APCs paid centrally by NTU. All other authors must meet the cost from their School budget.
