

## Open Access deals for NTU authors

The following publishers allow NTU authors to publish gold open access for **free** providing you are the **corresponding author**. Please note that the deal only applies to the open access costs and does not cover page and colour charges. Journals that are published on behalf of a Society may also be subject to an additional publication charge. Contact the [Library Research Team](#) for further help and support.

### How to take advantage of the deals

- Before submission: Check the journal you are targeting is included in the deal and that the journal meets your funder's open access and licence requirements. [Sherpa Fact](#) can help with this task.
- On submission: Use your **NTU email** when submitting your article to the publisher and identify **Nottingham Trent University** as your **affiliation** when prompted and in your paper.
- On acceptance: The publisher should make you aware of NTU's deal and you should choose to publish open access and to retain copyright by selecting an appropriate **creative commons licence** when you complete the journal publishing agreement.
- On publication: You are permitted to make the published version of record available online and to deposit it in [JRep](#) via [Worktribe](#).

### Which licence should I choose?

**UKRI or Wellcome funded?** You must choose the CC-BY licence when publishing open access.

Any of the Creative Commons licences will allow you to comply with the REF open access policy.

- **[CC-BY \(Creative Commons Attribution Licence\)](#)**: Allows others to copy and redistribute the material in any medium or format and remix, transform and build upon the material for any purpose, even commercially. This is often the preferred choice for journal articles, particularly in science, technology and medicine, as it allows other researchers to make full use of the findings in their own work. This licence is Plan S compliant.
- **[CC-BY-NC \(Creative Commons Non-Commercial Licence\)](#)**: Allows others to copy and redistribute the material in any medium or format. However, the material may not be used for commercial purposes. It can be an appropriate licence for monographs because it protects print copy sales while still providing scope for users to create derivative works of the online version to the benefit of all academia.
- **[CC-BY-NC-ND \(Creative Commons Non-Commercial No-Derivatives Licence\)](#)**: Allows others to copy and redistribute the material in any medium or format. However, the material may not be used for commercial purposes and if you remix, transform or build upon the material these modifications cannot be distributed. The licence is particularly appropriate for books and other products where significant revenue is needed from derivative rights sales (for example, translation rights), in order to keep author charges low.
- **[CC-BY-NC-SA \(Creative Commons Non-Commercial Share-alike\)](#)**: Allows others to copy and redistribute the material in any medium or format, remix, transform and build upon the material for any non-commercial purpose, but the material may not be used for any commercial purpose. If the material is remixed, transformed or built upon, it must be distributed under the same licence as the original. While the Share-alike licence might sometimes encourage further uptake of OA by authors wanting to re-use the content, it can also create an unnecessary barrier to the re-use of the OA content.

<b>American Chemical Society (2019-2021)</b>	
<b>Summary</b>	The deal applies to all ACS journals except the ACS Omega titles. NTU has an allocation of 13 articles per calendar year.
<b>Author actions</b>	When completing the Journal Publishing Agreement, select the option to 'purchase Open Access' (the fee will be covered by our institutional agreement). When completing the 'Pay Author Charges' form within Copyright Clearance Centre, select the option to 'seek funding from' Nottingham Trent University. <a href="#">Full author instructions</a>
<b>Open Access Licensing</b>	ACS Authors who wish to publish open access can choose from two Creative Commons <a href="#">licences</a> , CC-BY and CC-BY-NC-ND. You should choose to make your article immediately accessible.

<b>Cambridge University Press (2021 and 2024)</b>	
<b>Summary</b>	You can publish in <b>any</b> CUP journal but only the following articles types are eligible for the APC fee waiver: research articles, review articles and rapid communications, brief reports and case reports.
<b>Author actions</b>	Full author instructions: <a href="https://www.cambridge.org/core/services/open-access-policies/read-and-publish-agreements/oa-agreement-jisc">https://www.cambridge.org/core/services/open-access-policies/read-and-publish-agreements/oa-agreement-jisc</a>
<b>Open Access Licensing</b>	CUP will allow you to select from any of the four creative commons licence types.

<b>Company of Biologists (2021- 2021))</b>	
<b>Summary</b>	NTU authors can publish open access in Development, Journal of Cell Science and Journal of Experimental Biology. Articles will be deposited in PubMed Central.
<b>Author actions</b>	On submission: select 'gold open access' and 'read and publish fee waiver'. On acceptance: you will be directed to RightsLink and should select 'seek funding from Nottingham Trent University' to have the automatic fee waiver applied. You will receive a confirmation email when the library has verified your affiliation. <a href="#">Full author instructions</a>
<b>Open Access licensing</b>	CC BY is the default licence.

<b>Institute of Physics (2020-2023)</b>	
<b>Summary</b>	NTU authors can publish open access in any IOP journal included in <b>list A and B</b> This process applies to all primary research article types as well as reviews: Letters, Papers, Reviews and Special Issue articles.
<b>Author actions</b>	IOP automatically identifies eligible articles and notifies authors during the peer-review process or shortly after acceptance, and your paper will automatically be made open access. You'll be asked to agree to the CC-BY open access licence. <a href="#">Full author instructions</a>
<b>Open Access Licensing</b>	IOP only offers the CC-BY licence.

<b>Microbiology Society (1 year agreement 2021)</b>	
<b>Summary</b>	NTU authors can publish immediate open access free of charge in any Society journal.
<b>Author actions</b>	You will be asked to identify that you are publishing via the 'read and publish' route. <a href="#">Full author instructions</a>
<b>Open Access Licensing</b>	You will be asked to sign the Society's standard <a href="#">CC-BY Creative Commons licence</a>

<b>Oxford University Press (2021 -2023)</b>	
<b>Summary</b>	NTU authors can publish in <b>any</b> OUP journal providing the output is a research or review article.
<b>Author actions</b>	The corresponding author will receive an invitation to accept the licensing terms and be notified of the NTU deal. They should select this option when they login to the OUP licensing and payment system. <a href="#">Full author instructions</a>
<b>Open Access licensing</b>	Individual OUP journal offer different licensing options. Find out more <a href="#">here</a>

<b>Royal Society of Chemistry (2020 - 2021)</b>	
<b>Summary</b>	NTU has been allocated 12 APCs to cover the cost of publishing immediate open access in any RSC hybrid journal at no cost to the institution. This is offered on a first come, first served basis. <b>Caution - extras cost more.</b> Fees for things like reprints or cover artwork count as extra charges, so make sure to factor this in as this will not be paid by the library.
<b>Author actions</b>	NTU authors should indicate they wish to publish open access and the library will approve the request. <a href="#">Full author instructions</a>
<b>Open Access Licensing</b>	Do not sign the standard licence to publish; upon acceptance of your manuscript, you will be able to choose and sign the CC BY or CC BY-NC open access licence.

<b>Sage (2020-2022)</b>	
<b>Summary</b>	Corresponding authors publishing an article in 900+ subscription journals in the current <a href="#">SAGE Premier package</a> , as well as in the <a href="#">IMechE Journal Collection</a> and the <a href="#">Royal Society of Medicine Collection</a> , which offer hybrid open access publishing ( <a href="#">SAGE Choice</a> ) can be published as immediate open access.
<b>Author actions</b>	Authors should complete SAGE's Journal Contributor's Publishing Agreement on acceptance as normal. An Open Access Contributor's Agreement will replace this once you select Open Access in the SAGE Portal <a href="#">Full author instructions</a>
<b>Open Access Licensing</b>	Sage will allow you to select your preferred creative commons licence.

<b>Springer Compact Agreement (current agreement ends in 2022)</b>	
Summary	NTU authors can publish immediate open access free of charge in <a href="#">eligible Springer Choice (hybrid) journals</a> . Eligible article types include original research papers, review papers and brief communications.
Author actions	Springer will recognise you are eligible for free OA and you should confirm you wish to proceed and agree to the licence. <a href="#">Full author instructions</a>
Open Access licensing	Springer's preferred licence is CC-BY.

<b>Taylor and Francis (2021 – 2023)</b>	
Summary	NTU authors can choose to publish immediate open access in any Open Select (hybrid) journal. Use the <a href="#">Open Access Cost Finder</a> to identify eligible titles Editorials, book reviews and announcements are excluded from this deal.
Author actions	Select open access when signing the author publishing agreement.
Open Access licensing	Funded authors will be directed to the required licence type. Non-funded authors can select their preferred licence out of CC BY or CC BY-NC-ND.

<b>Wiley (March 2020 -December 2023)</b>	
Summary	<p>NTU authors can publish immediate open access free of charge* in <b>any</b> Wiley journal (full gold and hybrid titles are included).</p> <p>*Small print: This is a national agreement for UK HEIs and Wiley manages a central pot of money to cover APC fees across all UK institutions. A key condition of the agreement is that Wiley has guaranteed to pay the APC charges for UKRI and Wellcome funded researchers out of this pot. This is subject to annual monitoring and Wiley will restrict the deal to funded authors when the money runs low. <b>They expect to apply this restriction at the end of June 2021. The pot will reset itself in January 2022.</b></p> <p>If you plan to publish in a hybrid journal then you can still go ahead and publish in the usual fashion and you can deposit a copy of the accepted manuscript in Worktribe/IREp. However, if you were planning to publish in a fully open gold journal then you will have to find the money to cover the APC or change to a hybrid journal.</p> <p>Check if a Wiley journal is a hybrid or fully gold journal <a href="#">here</a></p>
Author actions	<a href="#">Full author instructions</a>
Open Access licensing	Check the licence options for your chosen journal <a href="#">here</a> .

## Version Control and Change History
